Wall Street Silver
@WallStreetSilv

1) Bill Gates company released billions of mosquitoes in Florida & Texas.

2) Malaria now in Florida & Texas for the first time in 20 years.

3) Bill Gates has a malaria vaccine almost ready.

Hydroxycholorquine is an anti-malarial drug.
No vax needed.

Readers added context they thought people might want to know

These gene modified mosquitoes are incapable of spreading disease: Only female mosquitoes bite, and these die before adulthood.
Additionally, they were released in Monroe County, 160 miles away from the detected cases, as well as California. None were released in Texas.
